

NIBBLES FROM THE BUNNIES

May 2018

CLASSROOM HIGHLIGHTS

April was a quick but busy month in the Bunny Room. We concluded our colors theme with Rainbow Week, making rainbow wands as well as creating a rainbow garden on our bulletin board. We practiced our fine motor skills by stringing rainbow necklaces and dropping pom-poms down cardboard tubes. We have been working hard on our YOGA poses and we now can do 6 poses. In addition we celebrated Earth Week. The children had fun painting two boxes which we then made into our trash munchers. We have used them to recycle our paper plates and cups after snack. During the month of May we will continue with a Spring theme and have some fun activities planned.

TIDBITS

With the warmer weather here, Paula Passi McCue has compiled a list of fun gross motor activities to do outside. In addition, there are two more articles of interest. One highlighting the benefits of playground play and another article that features why we correct "W-Sitting." All of these can be found on the sign in table.

STEM

Thank you for supporting our continued development of STEM curriculum. We enjoyed the Hightouch-Hightech presentations on Insects and Weather.

FAVORITE ACTIVITIES

Rainbow Wands
Stringing rainbow necklaces
Rainbow Rice
Pom-Poms in the sensory table
Grass and bug headbands
